

EXPERIMENT – 12

Study of Camera Phishing Using an Open-Source GitHub Tool in Kali Linux (Educational Demonstration)

Procedure

Step 1: Start Kali Linux Virtual Machine

1. Open Oracle VirtualBox.
2. Start Kali Linux.
3. Log in using Kali credentials.

Step 2: Study the Open-Source Tool

1. Access an open-source GitHub repository related to camera phishing (educational purpose).
2. Review the documentation to understand:
 - How fake permission prompts are created
 - How user interaction is exploited
 - Ethical limitations of such tools

Step 3: Understand the Attack Workflow

1. Analyze how phishing pages request camera permissions.
2. Observe how browsers handle camera access requests.
3. Study how attackers misuse user trust.

Step 4: Simulated Demonstration

1. Perform a **local, consent-based simulation** using test accounts.
2. Observe how camera permission prompts appear.
3. Analyze user response behavior.

Step 5: Analyze Security Implications

1. Identify risks related to:
 - Unauthorized camera access
 - Privacy leakage
 - Social engineering
2. Discuss how modern browsers and OS security attempt to mitigate such attacks.

Step 6: Study Prevention Techniques

- Browser permission management
- User awareness and training

- HTTPS and trusted domains
- OS-level camera access controls

Output

Camera Phishing

A page to take pictures from the front and back camera

This program requires php, ngrok and python! Please install these prerequisites before running

requires

- Install Ngrok
 - Windows: <https://ngrok.com/download#windows>
 - Linux: <https://ngrok.com/download#linux>
 - Termux: https://wiki.termux.com/wiki/Installing_ngrok
- Install php:
 - Windows: <https://www.php.net/download.php>
 - Linux: sudo apt install php
 - Termux: pkg install php
- Install Python (py3)
 - Windows: [Download](#)
 - Linux: sudo apt install python3
 - Termux: pkg install python

Result

The study of camera phishing using an open-source GitHub tool was successfully completed in Kali Linux.

The experiment enhanced understanding of social-engineering attacks and emphasized the importance of user awareness and privacy protection.
